 [guhenriques1398@gmail.com](mailto:guhenriques1398@gmail.com)

 0742340-1232

 London

**Right to work: Spouse Visa**

### SKILLS

#### Front-end:

- HTML5, CSS3, JavaScript
- Bootstrap
- jQuery, React

#### Back-end:

- PHP
- Node.js
- Express
- SQL
- MongoDB
- REST API

#### DevOps:

- Git & GitHub
- Swagger
- Docker

### LANGUAGES

- English
- Portuguese
- Spanish

### EDUCATION

#### Systems Development & Analysis

**University Estacio de Sa -  
Sao Paulo, Brazil**

2020-2022

### PROFILE

I have several years of customer service experience and dedicated 2 years to coordinating a Minecraft Server Project. During this time, I discovered a genuine interest in programming and development.

Recently, I completed a coding traineeship as a full stack developer, completing two real-world projects to specification using a diverse set of programming languages.

Enthusiastic about pursuing my passion, I am eager to forge a career in the development field where I can showcase my skills as a valuable asset.

### CODING TRAINEESHIP

#### Full Stack Developer - 1 year program

##### IT Career Switch

Jul 2022 - Jul 2023

During the traineeship I had to demonstrate a very competent level of the following programming languages and technical skills:

- HTML5, CSS3, Bootstrap, JavaScript
- PHP, SQL, React, jQuery
- Python, Node.js, Express
- Git, GitHub
- REST API.

Below are the two briefs of development projects I completed with IT Career Switch, which can be found in my bio: <https://gustavopereira.co.uk/>

#### Portfolio Project #1 - "Gazetteer"

- The task was to respond to a website specification for a map-based app designed to offer information about various countries, with a strong emphasis on "mobile-first" development. It was recommended to employ a framework for this purpose, followed by the creation of HTML, CSS, and JavaScript with jQuery modules. These modules would then utilize PHP server-based components to fetch data from third-party APIs. The evaluation of the solution would be based on its adherence to the specifications, functionality, and user-friendliness.

#### Portfolio Project #2 - "Company Directory"

- A more rigorous reply to this specification was required as a user requirements document was needed to be prepared which, when signed off, triggers the release of SQL allowing to develop a "mobile-first" application to maintain a company personnel database (MySQL). Sign off is only achieved upon the student supplying an independently witnessed document providing confirmation of the system's ability to perform error-free.

---

# WORK HISTORY

## Intern Front End Developer

**Fashion AI - London - UK**

Nov 2023 - Present

- Working with the development team to design, develop, and maintain user interfaces for AI-powered fashion platform
- Implementing responsive designs that work seamlessly across different devices and browsers
- Writing clean, modular, and well-documented code using JavaScript, HTML, CSS, PHP and JSON
- Collaborating with the product and design teams to ensure that designs are implemented accurately and efficiently

## Volunteer Web Developer

**Amnick Social Enterprise - London - UK**

Aug 2023 - Oct 2023

- Collaborated with a team of developers to rebuild company websites exclusively using WordPress.
- Assisted with content migration.
- Focused on creating responsive and mobile-friendly designs while working closely with other developers to meet the company's WordPress requirement
- Provided basic SEO optimization.

## Customer Assistant
